1. Getting Started with Quick Broadcast

Welcome to Quick Broadcast.

Quick Broadcast is a remarkable tool that helps you create a quality blog and podcast site. As you become familiar with all that Quick Broadcast has to offer, you'll be amazed at how quickly and easily you can build your own unique broadcast site.

Quick Broadcast includes everything you need to:

- Create a professional blog.
- Easily record and upload podcasts to share with visitors to your site.
- Allow visitors to subscribe to your blog entries and podcasts.
- Include RSS feeds, Twitter links, Flickr, and many other services.
- Customize your site to suit your taste.

What is a Broadcast?

A broadcast is simply the combination of a blog and podcast into a single Web site. A blog is a weblog, or journal, that is available on the Internet. A podcast is an audio or video file that you share with visitors or subscribers to your site. Quick Broadcast enables you to easily create both; you don't have to choose one or the other. Additionally, with Quick Broadcast, you can freely add text, photos, and music to your broadcast entries.

SETTING UP YOUR ACCOUNT

The first step to get started is to set up your account. You need to enter some basic information and specify the domain name you want to use for your Quick Broadcast site.

► To Set Up Your Account

1. Log in to your **Account Manager**.
2. In the **My Products** section, select **Quick Broadcast**.

- Click **Setup Account** next to the account you want to use.

Fig. 1.1 - Open link in your Account Manager.

- To accept the End User License Agreement terms of use, click **Accept**.
- From the Create New Blogcast Site page, enter the following information:

Display name

Enter your name as you want it to display on each entry you post.

Email

Enter your email address.

Domain

Select one of the following options:

Create a new subdomain

Enter the subdomain prefix and select one of the domains in your list.

Select an available domain from your account

Select from the list of available domains already associated with this account.

Enter a domain not registered here

Enter the full domain name. For example, www.coolexample.com.

Account Settings

Display name:

Email:

Domain:
Set up your Quick Blogcast site as a subdomain of one of your domain names, select a different domain from your account, or enter a domain that is registered with another Registrar to associate with your Quick Blogcast site.

If you use a domain registered with another registrar, you need to update the 'A Record' for your domain so it points to the IP address 208.109.80.14. Check with your domain name registrar for more information.

Create a new subdomain:
 Select an available domain from your account:
 Enter a domain not registered here:

.

Fig. 1.2 - Create New Blogcast Site page.

- Click **Save**.

You have set up your blog. We sent a user name and password to the email address you provided. You can now update your author information or start designing your blog site.

► To Update Your Author Information

1. From the **Manage Blog** menu, select **Author Information**.
2. Click **Edit** next to your Display Name.
3. Edit the author information in the following fields:

First Name and Last Name

Enter your first and name.

Display Name

Enter your name as you want it to display on each entry you post.

Email Address

Enter your email address.

User Name

Enter a user name.

Password and Verify Password

Enter and verify a password.

► To Design Your Blogcast Template

1. Select the **Templates** tab.
2. In the **Blog** section, click **Change Template** to activate the Template Selector.

NOTE: If you have not yet assigned a Blog Template, click the Dashboard tab, and then click Assign in the Quick Blogcast section. The Site Links page displays, where you can select the Quick Blogcast site you want to assign to your Dashboard. Click the Templates tab to return to the Templates page.

Fig. 1.3 - Locate and click a template you want to apply.

3. In the Available Templates area, you can do one of the following, and then click a template thumbnail to select it:
 - Scroll through the templates available in the Category you previously selected during setup.
 - Click Filter and complete the following for a more advanced search:
 - Category**
Select a category that best describes the type of site you want to build.
 - Templates that work with**
Click the icon(s) that represent the product(s) for which you want to use the template, and then click Update. For example, if you want your Blog site to match your shopping cart, select both Site and Store so only templates that work with both display
4. In the Available Templates area, change the color scheme of your template by clicking one of the color swatches next to the thumbnail of the template.

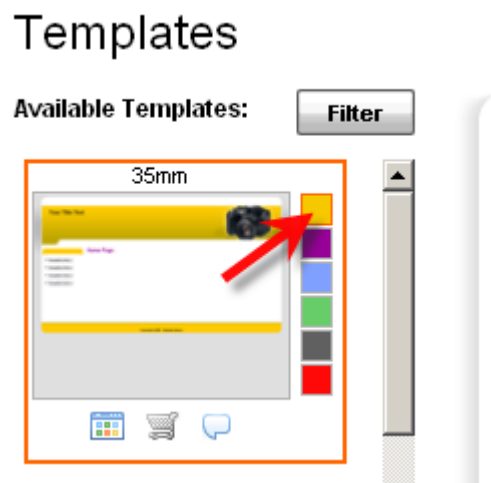

Fig. 1.4 - Select a color theme.

5. Click **OK**.

If you want to update your template, you can return to the template designer at any time by selecting **Templates** from the Design menu.

GETTING HELP

After you set up your account, you can always find help in the Help Center.

► To Access the Help Center

1. Log in to your Account Manager.
2. From **My Products**, select **Quick Blogcast Accounts**.
3. Click **Setup Account** next to the account you want to work with.
4. From the **Help** menu, select **Online Help**.

The Help Center, which is a knowledge base with the most current information, opens in a new window.

NOTE

5. Under **Select Your Product**, click **Site Builders**, and then select **Quick Blogcast**.

2. Adding Content to Your Blogcast Site

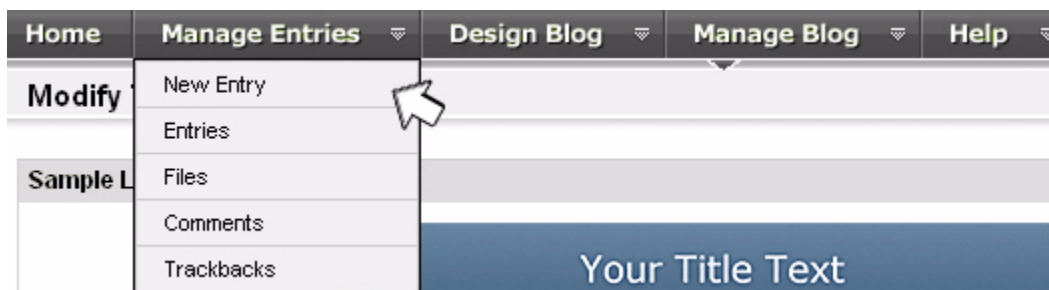

After you have designed your Quick Blogcast site, you are ready to begin adding entries. With Quick Blogcast you can add entries consisting of text, audio and video podcasts, and images. You can even combine these elements in a single post.

Quick Blogcast offers a variety of ways you can interact with your blogcast site. For instance, Quick Blogcast supports remote blogging and blogging by email. Let's examine the most common way of adding an entry to your site.

ADDING A BLOG ENTRY TO YOUR BLOGCAST

► To Add a New Entry

1. From the Manage Entries menu, select **New Entry**.

2. In the **Title** field, type the entry title.
3. In the **Categories** field, enter a category. Alternatively, you can add and select a recurring category from the categories section on the left.
4. In the **Tags** field, enter a tag. Alternatively, you can add and select a recurring tag from the tags section on the left.

5. Enter the body of your entry in the text area. You can use the formatting tools at the top of the text area to format your entry.

6. From the Entry Settings toolbox on the left, you can configure your entry settings in the following ways:

Status

Select whether you want to save the entry as a Draft or to Publish it when you click Save. Saving in Draft status is helpful if you want to create an entry, but are not ready to have it display on your site.

Timestamp

Enter the date and time that you want to display in the time/date stamp.

Comments Status

Select if you want to allow comments and set the default status of comments made to Open or Closed.

Allow Trackbacks

Select if you want to allow trackbacks and set their status as Open or Closed. Trackbacks let you know if someone is linking to your article.

Outgoing Trackbacks

Enter one or more URLs that you want to notify of the creation of your entry. You can ping (notify) other blogs that you refer to in your entry or online blog directories.

Permalink

Specify the name you want to use for the permanent link to this blog entry. If you do

not specify a Permalink name, Quick Blog assigns a name after you save the entry. The Permalink name cannot be edited after the entry is published.

► **Categories**

► **Excerpt**

7. From the Categories toolbox you can add and select categories to organize your entries, so you do not have to manually enter a category for each entry.
 - To add a category, type the name of your category in the text field and click **Add**. The category displays under the entry box. You can repeat this process to add additional categories.
 - To assign an entry to a category, click the category you want to use from the categories toolbox. The category displays in the Categorized field, under the Title field.

► Entry Settings

► Categories

[Education in Town](#)

[For Sale](#)

[Today's News](#)

[Upcoming Events](#)

► Excerpt

8. From the Tags toolbox you can add and select tags to organize your entries, so you do not have to manually enter a tag for each entry.
 - To add a tag, type the name of your tag in the text field and click **Add**. The tag displays under the entry box. You can repeat this process to add additional tags.
 - To assign an entry to a tag, click the tag you want to use from the tag toolbox. The tag displays in the Tags field, under the Title field.
9. In the Excerpt toolbox, you can enter or paste an excerpt from your entry. This excerpt displays on the blogcast page under the title of your entry.
10. Click **Save**.

ADDING A PODCAST

Quick Blogcast has found a creative way to merge blogs and podcasts, including the posting of both audio and video. Podcasts are added to your site in much the same way a blog entry is added. In fact, the procedure is essentially the same.

There are two ways in which to add a Podcast to your site. You can upload an existing file to Quick Blogcast or you can create a podcast using our Quick Recorder.

What Are ID3 Tags?

Before we add our podcast, let's explore ID3 tags. ID3 tags allow information such as the title, artist, album, track number, or other information about the file to be stored in your podcast file. This information is available to the listener and can be displayed on most MP3 players. Including this information also allows your podcast to be indexed by search engines and iTunes.

► To Upload a Podcast to Your Site

1. From the Manage Entries menu, select **Add Podcast**.
2. Click **Browse** and select your podcast file.

3. Click **Upload**.

4. Enter ID3 tag information by completing the following fields.

Subtitle

Enter the subtitle of your podcast episode. Often, the subtitle explains the main title.

Composer

Enter the composer's name. This can be the podcaster's name, or the author of a book or music.

Album Info

Enter information you want to include about the album the file is from. This entry is not necessary if the entry is not part of a larger compilation of work.

Podcaster

Specify the name of the person who created the podcast.

Podcast Summary/Description

Enter a summary of the podcast or comments you want to include about it.

Copyright Message

Enter copyright information for the podcast. Typically this includes the word "Copyright," the year of publication, and the name of the owner of the entry.

Keywords

Keywords are words that explain or summarize your entry. Keywords help direct search engines and directories to your entry or broadcast site. Keywords should be separated by a comma.

Explicit

In the explicit drop-down box, you can select whether or not to mark your entry as containing explicit content.

NOTE

You can set ID3 tag settings for each individual podcast, or set the ID3 tag settings to apply to every podcast published to your site. To make the ID3 information apply to each future podcast, select **Use as default for ID3 tags** at the top of the ID3 settings list.

5. Click **Save**.

Congratulations! You have successfully added a podcast to your blogcast site.

You can also record a podcast directly to Quick Blogcast using our Quick Recorder, our fully-functional podcast recorder. However, you first need to install it on your computer.

Currently, Quick Recorder is only available for PC users.

NOTE

► To Install Quick Recorder on Your Computer

1. From the Manage Entries menu, select **Add Podcast**.
2. Click **Install Recorder**.
3. Click **Install**. The Application Install - Security Windows displays.
4. Click **Install**.

► To Create a Podcast with Quick Recorder

1. Open Quick Recorder.
2. On the **Sound Settings** tab, you can enable the following options:

Vocal Compression

Enables vocal compression for your recording. Select Low Compression or High Compression.

Mic Boost

Doubles the volume of the sound coming into the recorder.

Phase Shift

Adds a phasing effect to your recording.

3. Adjust the level of sound going into the recorder using the gain fader slider located below the File menu.
4. Click **Record** (red circle).

5. In the File name field, enter a title for your recording and click **Save**. Quick Recorder starts recording.

6. When you are finished recording, click **Stop** (green square).

To hear your recording, click **Play** (green arrow).

The gain fader on the left side of the recorder adjusts the input level. It does not adjust the output volume.

NOTE

After you've uploaded or created content, you are ready to publish your entries to the Internet so they can be enjoyed by visitors to your site.

3. Managing Blog Entries

You can add as many new entries to your blogcast site as you want. However, the entries do not display on the Internet until you publish them. You can publish specific entries, leaving others unpublished. You can also remove entries from your site; this is referred to as deleting your entry. A deleted entry no longer displays on your site, but is easily recoverable. This feature gives you the ability to archive past entries and re-publish them at a later time.

MANAGING ENTRIES

From the Manage Entries page, you can quickly manage your site content. You can work with one entry or multiple entries. To perform an action, select the checkbox to the left of the entry or entries to which you want the action to apply, and then perform the update.

► To Publish a New Entry

1. From the Manage Entries menu, select **Entries**.

2. On the Manage Entries page, there are two search options to sort your entries in the Entries list.

View

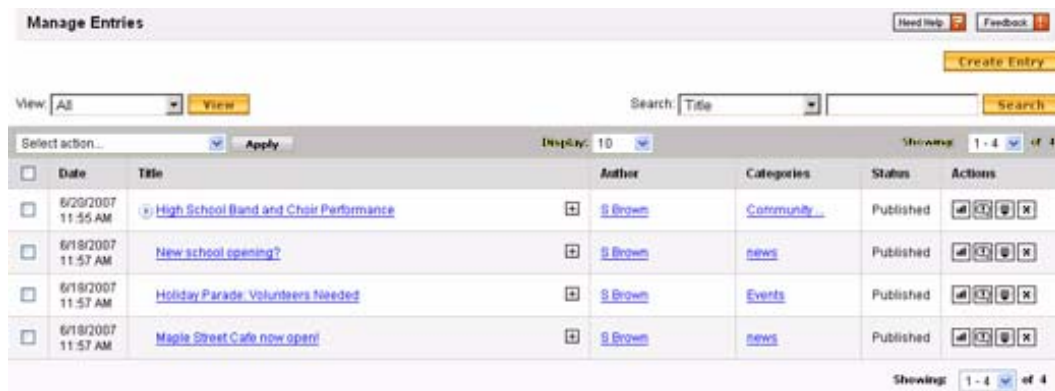

Select a Month/Year from the Month Search drop-down list and click **View**.

Search

Select whether to search the Title, Title and Contents, Category, Status, or Author, then enter a keyword, and click **Search**.

3. Publish entries by doing one of the following:

- Click the publish icon next to the entry that you want to publish.
- Use the checkboxes to select the entries you want to publish, and then select **Publish Entries** from the Select Action drop-down menu and click **Apply**.

The screenshot shows the 'Manage Entries' interface. At the top, there are buttons for 'Need help?', 'Feedback', and 'Create Entry'. Below that, there are search and view options. The main part of the interface is a table with the following columns: Date, Title, Author, Categories, Status, and Actions. The table contains four entries, all published by 'S. Brown'. The entries are:

Date	Title	Author	Categories	Status	Actions
6/29/2007 11:55 AM	High School Band and Choir Performance	S. Brown	Community	Published	[Icons for edit, delete, etc.]
6/18/2007 11:57 AM	New school opening?	S. Brown	news	Published	[Icons for edit, delete, etc.]
6/18/2007 11:57 AM	Holiday Parade: Volunteers Needed	S. Brown	Events	Published	[Icons for edit, delete, etc.]
6/18/2007 11:57 AM	Maple Street Cafe now open!	S. Brown	news	Published	[Icons for edit, delete, etc.]

At the bottom of the table, there are options for 'Display: 10' and 'Showing: 1 - 4 of 4'.

NOTE

In the Display select box, you can select to display 10, 20, 50, or 100 entries per page. If there is more than one page, change pages by selecting a different option from the Showing menu.

► To Delete an Entry

Deleting an entry removes the entry from displaying on your broadcast site. It does not remove the entry from your account. The entry can be recovered at any time from the Manage Entries page.

1. From the Manage Entries menu, select **Entries**.
2. In the Entries List, locate the entry you want to delete.
3. There are two search options to sort your entries in the Entries list.

View

Select a Month/Year from the Month Search drop-down list and click **View**.

Search

Select whether to search the Title, Title and Contents, Category, Status, or Author, then enter a keyword, and click **Search**.

4. Delete entries by performing one of the following actions:

- Click the delete icon next to the entry that you want to delete.
- Use the checkboxes to select the entries you want to delete, select **Delete Entries** from the Select Action drop-down menu, and then click **Apply**.

► To Recover a Deleted Entry

1. From the Manage Entries menu, select **Entries**.
2. From the Search menu, select **Status**.
3. In **Search** field, type **Delete**, and then click **Search**. A list of deleted articles displays.
4. Use the checkboxes to select the entry(ies) you would like to recover.
5. From the Select Action menu, select **Publish Entries**.
6. Click **Apply**.

MANAGING COMMENTS

Comments make your site interactive by allowing visitors to share their thoughts on your posts. Quick Blogcast allows you to manage comments in various ways.

With Quick Blogcast, you can choose to view all or a portion of the comments submitted to your site. To view a certain type of comment, use Quick Blogcast's filtering option.

► To Filter the List of Comments

1. From the Manage Entries menu, click **Comments**.

2. From the View list, select one of the following and then click view.

All

View all comments.

Pending Approval

View all comments that are pending approval.

Approved

View all approved comments.

Spam

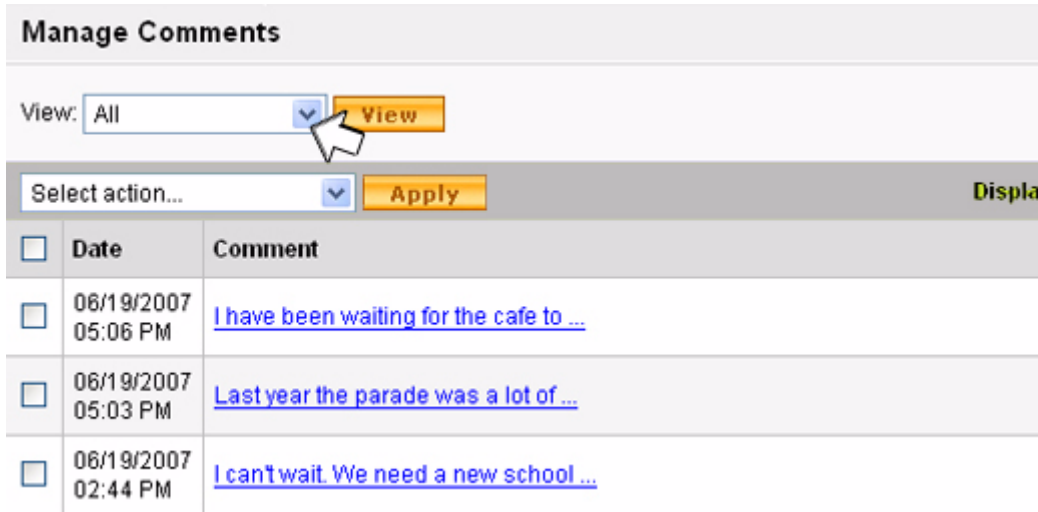

View comments that were marked as spam.

Deleted

View deleted comments.

Showcased

View showcased comments. Click **View**.

The Manage Comments page displays the type of comments you have chosen to view.

Viewing Comment Contents

In the Comments list, you can select to display 10, 20, 50, or 100 entries per page. If there is more than one page, change pages by selecting a different option from the Showing menu.

► To View Comments

1. From the Manage Entries menu, click **Manage Comments**.
2. Click the expand icon next to the title to view the content of the comment.
3. Click the entry title the comment is associated with to open the entry in the Entry Editor.

Managing Comments

From the Manage Comments page, you can approve or delete comments, ban IP addresses, or mark comments as SPAM.

► To Manage Comments

1. From the Manage Entries menu, select **Comments**.
2. Select the comments that you want to manage using the checkboxes located to the left of each comment.

<input checked="" type="checkbox"/>	06/19/2007 05:03 PM	Last year the parade was a lot of ... ★
<input checked="" type="checkbox"/>	06/19/2007 02:44 PM	I can't wait. We need a new school ... ★

3. From the Select Action menu, select one of the following options.

Add to Showcase

Adds the selected comments to the Showcase. When a visitor click on the sidebar Showcase link, the selected comments display on a new page. To enable this, you must activate the Showcase component from the Sidebar page.

Approve Comments

Approves the selected comments, allowing them to be read by your site visitors.

Ban IP Address

Blocks a specific authors from commenting. This is done by detecting the author's IP Address and blocking future submissions from that address.

Delete Comments

Deletes selected comments.

Mark Comments as SPAM

Marks the selected comments as SPAM.

Print Selected Comments

Prints the selected comments.

Remove from Showcase

Removes the selected comments from the Showcase.

From the Manage Comments page, you can easily organize and manage the comments submitted to your site. Enjoy!

4. Customizing Your Template

CUSTOMIZING YOUR TEMPLATE

The Quick Blogcast Customize Template page gives you the tools to completely customize your blog site and easily create the site you want.

Let's take a look at how to customize your blogcast site.

► To Customize Your Template

1. From the Design Blog menu, select **Customize**.

2. Update the information you want to change on the following tabs:

Colors

Make changes to the look and feel of your template. For more information, see Setting Colors for Your Blog below.

Template Images

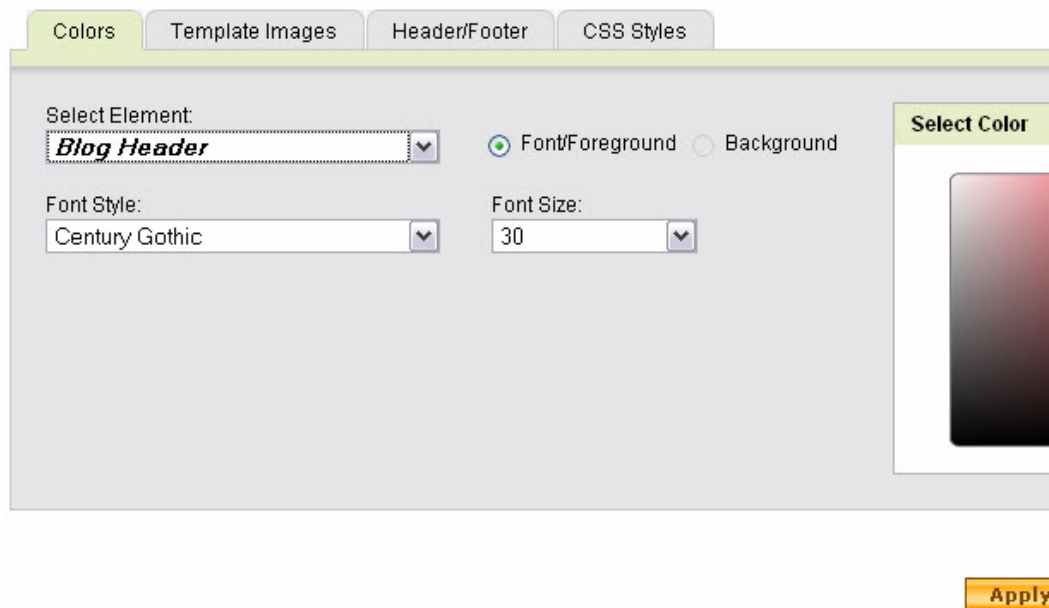

Make changes to the images your template uses. For more information, see Changing Template Images below.

Header/Footer

Change your site's header and/or footer. For more information, see Changing Your Blog's Header and/or Footer below.

CSS Styles

Make changes to the template's CSS. For more information, see Customizing Your Template Using CSS below.

3. When finished, click **Save**.

Your newly designed site is now ready to be enjoyed by visitors.

Setting Colors for Your Blog

1. From the **Design Blog** menu, select **Customize**.
2. Select the **Colors** tab.
3. In the following fields, edit the elements you want to change:

Select Element

Select an element of your template that you want to customize. Edit the selected element using the following options:

Font/Foreground and Background

Specify if you want to edit a font/foreground color or background color, using the color picker.

Font Style and Font Size

Select a different font and/or size for the selected element.

Select Color

Using the color picker, select a color for the selected element.

4. To preview your changes, click **Apply Changes / Update Preview**.

5. To publish your changes, click **Save**.

Changing Template Images

1. From the **Design Blog** menu, select **Customize**.
2. Go to the **Template Images** tab.
3. Select the image you want to change, and then click **Change Image**.
4. To upload an image, in the **Select image** area, click **Browse**, then locate and select the image, and then click **Upload**.

NOTE

If you have already uploaded the image you want to use, select the thumbnail in the Gallery.

5. Select the image you want to add to your template.
6. Click **OK**.
7. To change the way the image displays, from the Image Display list, select one of the following:

Tile Image

Tiles the image horizontally and vertically within the allotted space.

Preserve Original

Retains the original size and formatting of the image as allotted space allows.

Tile Horizontally

Tiles the image horizontally within the allotted space.

Tile Vertically

Tiles the image vertically within the allotted space.

Scale to Fit

Stretches the image so it fills the entire amount of allotted space.

8. To use the default template image, click **Revert to Original**.
9. Click **Apply Changes/Update Preview** to view your changes.
10. Click **Save** to update your live site with your changes.

Changing Your Blog's Header and/or Footer

1. From the **Design Blog** menu, select **Customize**.
2. Go to the **Header/Footer** tab.

NOTE

Quick Broadcast offers several different templates. Depending on the selected template, you update header/footer content using separate fields or in a WYSIWYG editor.

3. If your header/footer content displays in multiple fields, edit any of the following:

Header Text

The text that displays in your site header.

Header Link URL (optional)

The URL that displays in your site header.

New window, Current window

Opens the specified URL in a new browser window or the current browser window.

Subheader Text

The text that displays below the header. This is often a subtitle.

Footer Text

The information that displays at the bottom of your Web page.

4. If the header/footer content displays in a WYSIWYG, switch between header and footer content by clicking either the **Header HTML** hyperlink or **Footer HTML** hyperlink, depending on which displays, and then edit using any of the following lists or tools:

TIP

If you prefer to use HTML, click the <> signs to switch to HTML-entry mode.

Normal

Select the formatting style you want to use.

Font Name

Select the font you want to use.

Size

Select the font size you want to use. The font size ranges from 1 to 6; 1 is the smallest and 6 is the largest.

Bold

Bolds the text.

Italic

Makes the text italic.

Underline

Underlines the text.

Strikethrough

Draws a line through the text.

Numbered List

Creates a numbered list.

Bulleted list

Creates a bulleted list.

Increase Indent or Decrease Indent

Indent or decrease the amount of indented space for the paragraph.

Insert Table

Insert a table of a specified size into the header or footer.

Cut

Cut content from the page (which you intend to paste in a different location).

Copy

Cut content from the page (which you intend to paste in a different location).

Paste

Adds cut or copied content to the field.

Spell Check

Checks the spelling in the header and footer.

Insert Image from the Gallery

Insert an image from the gallery or upload your own custom image.

Insert Link

Adds a hyperlink. Highlight the text you want to add a hyperlink to, click Create Link, select the type of link, and enter the link information. Click OK.

5. When finished, click **Save**.

Customizing Your Template Using CSS

1. From the **Design Blog** menu, select **Customize**.
2. Go to the **CSS Styles** tab.
3. From the **View Style Sheet** list, select **Customized CSS** or **Theme CSS**.
4. In the **Customized CSS** file window, edit the CSS.
5. To view your changes in the preview window, click **Apply Changes/Update Preview**.
6. To update your live site with your changes, click **Save**.

5. Previewing and Publishing Your Design Changes

When you set up Quick Blogcast, your site automatically displays on the Internet as soon as it propagates. Propagation is a term describing the length of time it takes for all Internet servers to recognize your site.

New entries are not published until you explicitly save them in the Published status. See the Managing Blog Entries section for more information.

If you're making some changes to your blogs design, such as the colors it uses or the template images it uses, you must save these changes to make them live on the Internet.

Quick Blogcast gives you the option of previewing your site as you make changes, showing you how it displays on the Internet. This step gives you the option of making any changes before the site is actually published.

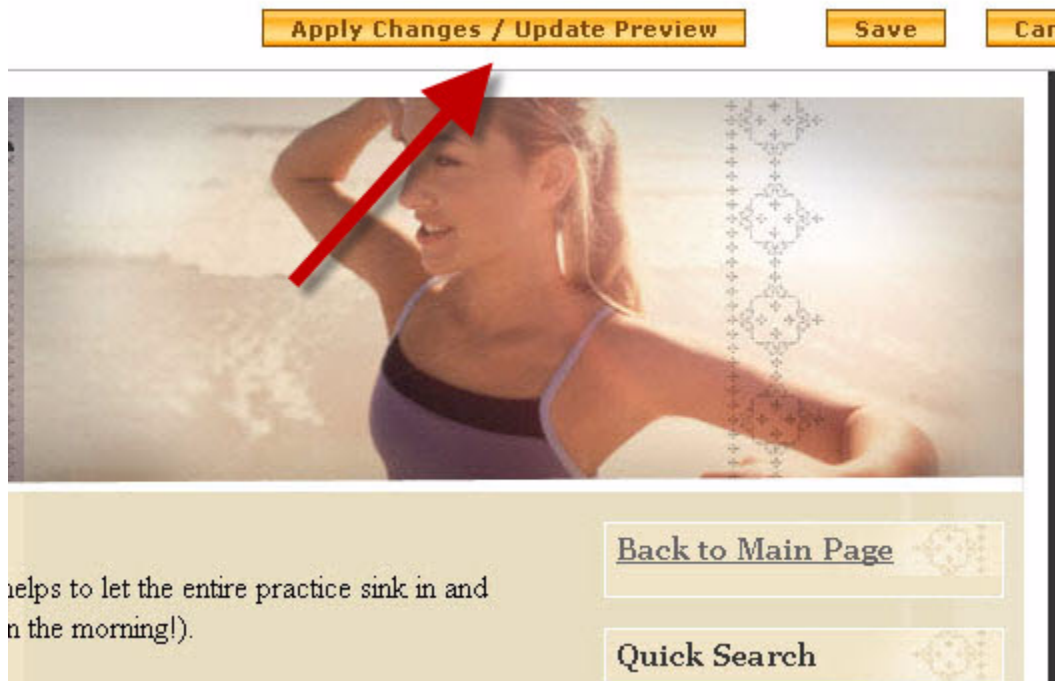

PREVIEWING YOUR SITE

You can preview your site at any time, to see how it would display on the Internet.

Any changes you make to your site display when you preview your site. However, your changes do not display on the Internet until you save them.

► To Preview Your Site

1. From the **Design Blog** menu, select **Customize**.
2. You can view your site in the preview window located in the center of the page.
3. To see any recent changes, click **Apply Changes / Update Preview**.

PUBLISHING YOUR SITE'S DESIGN

Congratulations! You are ready to publish your site. After publishing, your site updates display on the Internet.

► To Publish Changes to Your Site's Design

1. From the **Design Blog** menu, select **Customize**.
2. Make any necessary changes.
3. Click **Save**.

Great job! Your new design changes are live on the Internet!

Listed below are terms that are common in the world of blogging, podcasting, and blog-casting.

GLOSSARY

Adsense, Adbrite, CJ, Chitka, Blogads

Popular affiliate programs used to generate money from your blogcast account.

Archives

A collection of all your posts on one page. Can be categorized by month or category.

Blog

Shortened term of Weblog. A weblog is a journal (or newsletter) that is frequently updated and intended for general public consumption. Blogs generally represent the personality of the author or the Web site. A frequent and chronological publication of comments and thoughts on the web.

Blogcast

A blog and podcast merged into a single website.

Blogger

A person who owns or writes for a Weblog.
A person who blogs.

Blogging

The act of posting on blogs.

 Blogosphere

The Internet blogging community.

 Blogroll

List of links to other blogs located in your sidebar.

 Categories

A collection of topic specific posts.

 Commentator

A person who leaves remarks or a comment regarding an entry in a blog.

 Comments

Enabling readers to leave their remarks.
Remarks left by readers.

 Del.icio.us, furl, spurl

Social bookmarks used to share favorite sites.

 Entry

Individual articles that make up a blog

 Expandable post summaries

A small teaser part of the post on the index page that links to a full post.

 Flickr, Imageshack

Photo sharing services through which you can host images on your blog.

 Footer

The bottom portion of the blog, usually listing navigation and copyright statements.

Header

The top portion of the blog, usually listing the blog title.

Index page

The front page of your site.

Permalink

A link to a specific article in the archives of a blog, which remains valid after the article is no longer listed on the blog's front page.

Podcast

A form of audio and video blogging that allows users to subscribe to a feed and receive new files automatically by subscription.

Podcasting

A method of distributing audio and video files online. Podcasting often uses feeds for playback on mobile devices and personal computers. Podcasts are created by podcasters.

Post, Entry

Individual articles or audio/video posts that make up a blog or broadcast.

RSS

RSS is a Web content syndication format. RSS is an acronym for RDF Site Summary, Really Simple Syndication, or Rich Site Summary. Using RSS, you can subscribe to Web sites, such as news sites and blogs, and add the subscription to your blog. Content, or posts, from the Web site you subscribe to display on your Web site. Subscription content updates in real-time, that is, when the author submits an updated post, your Web page reflects the update.

A family of web feed formats used for Web syndication. Short form for Really Simple Syndication (RSS 2.0), Rich Site Summary (RSS 0.91, RSS 1.0), RDF Site Summary (RSS 0.9 and 1.0). Wordpress generates RSS 2.0

RSS Feed

RSS feeds provide items containing short descriptions of web content together with a link to the full version of the content.

Sidebar

One or more columns along one or both sides of a blog's main page, usually used for links, calendars, or lists.

Social Bookmark

Social bookmarking allows user to take bookmarks suggested by others and add them to their own collections. Users can also receive bookmarks by subscription.

Spam

Spam refers to unsolicited online messages. Most Spam is used for marketing; however, Spam can also occur in the form of blog comments. This form of Spam is created by an author who posts a link in the comment, for commercial purposes.

Trackback

A trackback sends a ping to another Web site equipped for trackbacks, notifying the site that a new link has been created. Trackbacks notify the author of an entry that the post has been added to another blog.

Web Feed

Allows users to subscribe to Web sites that regularly update or add new content.

Weblog

An online diary listing your thoughts on a specific topic, usually displayed in reverse chronological order.
