Transferring Domains From 1&1

This registrar can accept transfers from any registrar. With our Rapid Transfer System, domain transfers can often be completed in as little as five days or less. Note that some transfers may take up to seven days to complete.

To transfer a domain from 1&1 to this registrar, you will need the following information:

✔ Domain status – Locked or Active
✔ Administrative contact for registered domain
✔ Authorization or EPP code (.com, .net, .org, .biz, .us, .name, and .info TLDs only)

If you do not have the above information, you can obtain it from 1&1. Note that the domain transfer cannot succeed unless the domain name is unlocked, the administrative email address is valid, and the correct authorization code is provided (for .com, .net, .org, .biz, .us, .name, and .info domains).

See below for a description of the specific elements and issues involved in transferring a domain from 1&1 to this registrar.

Unlocking Domain
By default, most domains registered with 1&1 are placed under “Domain Lock” protection. Domain locking serves to prevent unauthorized transfers of your domain. Before a domain transfer is requested, the lock must be removed and the registry status verified as “Active.”

To Unlock a Domain
1. Log in to your 1&1 account at https://admin.1and1.com/.
2. If necessary, go to the Administration page for the package you want to access.
3. In the Basic Settings section, select Domains.
4. Use the checkbox to select the domain you want to unlock.
5. From the **Transfers** menu, select **Lock/Unlock**.

6. Select **Unlock**.

7. Click **OK**.

Note that it may take 24 hours before our system recognizes the status change.

**The Importance of the Administrative Domain Contact**

The administrative contact is one of the four contacts listed in the Whois database for a registered domain. The contact information is defined by the registrant. As part of the domain transfer process, we will send a transfer-approval email message to the domain's administrative contact listed in the Whois database. The email message contains the Transaction ID and Security Code that enable the administrative contact to approve the transfer.

**Changing Administrative Contact Information**

If you have just removed the lock from a domain registered with 1&1 (the “unlock” procedure is described above), 24 hours should elapse before the administrative contact responds to the transfer approval email message, as it can take up to 24 hours before our system recognizes changes to the domain's Whois information.

Any attempt to respond to the transfer approval message before the status change has been completed will result in transfer failure. You will receive an instant email notification of the failed transfer.

**To Change Administrative Contact Information**

1. Log in to the 1&1 Control Panel at [https://admin.1and1.com](https://admin.1and1.com).

2. If necessary, go to the Administration page for the package you want to access.

3. In the **Basic Settings** section, click **Domains**.

4. From the **Contact** menu, select **Edit Administrative Contact**.

5. Edit the administrative contact's information.

6. Click **Submit**.

Note that it may take up to 24 hours before our system recognizes the changes.
Authorization Code
To transfer a .com, .net, .biz, .info, .name, .org, or .us domain name you will need an authorization code. An authorization code is a unique code assigned by registrars to .com, .net, .biz, .us, .info, and .org domain names at the time of registration.

To Obtain Your Authorization Code
2. If necessary, go to the Administration page for the package you want to access.
3. In the Basic Settings section, click Domains.
4. Use the checkbox to select the domain for which you want to obtain the authorization code.
5. Click Info.

The authorization code displays in the Auth code field.

Transferring Domain
After you have prepared your domain and obtained the pertinent information for completing your transfer, you can transfer your domain to us.

To Transfer a Domain to Us
1. Advise the domain's administrative contact that the domain name is being transferred.
2. We will email the domain's administrative contact by the next business day with instructions on how to approve the transfer.
3. Once the administrative contact has approved the domain transfer, we will send a transfer request to the registry. If the domain's administrative contact does not have access to the account from which the transfer request was purchased, the recipient of the email request must forward the Transaction ID and Security Code (contained in the email) to someone who does. These codes must be entered on the Pending Domain Transfer screen in your account to approve the transfer. Once the Transaction ID and Security Code are successfully entered, we will request the transfer at the registry. The registrar of record then has five calendar days to deny the transfer. If the registrar of record does not deny the transfer, the transfer is automatically approved.
4. The registry will contact 1&1 via email.

5. 1&1 will send an acceptance or rejection notice to the registry.

6. The registry will notify us of the acceptance or rejection.

7. We will inform you via email that the transfer is complete.

Should the domain transfer fail, we will notify you via email. You may resubmit your transfer request if the transfer fails. However, to ensure that the information listed in your transfer request remains valid, you will have 30 days from the time of your purchase to complete the transfer.
